

Internet Safety Policy

January 2026

Schools and colleges have a statutory responsibility to keep children and young people safe online as well as offline. It is essential that children and young people are safeguarded from potentially harmful and inappropriate online material.

Norwich Steiner School is committed to providing a safe learning environment for its pupils. This policy outlines and describes our approach to information and communications technology (ICT) and online safety in the school. It reflects the school's ethos and curriculum and therefore takes account of the ages and developmental stages of pupils across the school. The policy forms part of our overarching safeguarding approach and should be read alongside the school's mobile phone and electronic devices policy, anti-bullying policy, safeguarding and child protection policy, the curriculum policy and the internet safety agreement.

An effective whole school approach to online safety empowers us to protect and educate pupils and staff in their use of technology and establishes mechanisms to identify, intervene in and escalate any concerns where appropriate.

Risk

The breadth of issues classified within online safety is considerable, but can be categorised into four areas of risk:

- **content:** being exposed to illegal, inappropriate or harmful content. For example- pornography, fake news, racism, misogyny, self-harm, suicide, anti-Semitism, radicalisation and extremism.
- **contact:** being subjected to harmful online interaction with other users; for example: peer to peer pressure, commercial advertising and exploitation including adults posing as children or young adults with the intention to groom or exploit them for sexual, criminal, financial or other purposes.
- **conduct:** personal online behaviour that increases the likelihood of, or causes, harm; for example, making, sending and receiving explicit images (e.g., Consensual and non-consensual sharing of nudes and semi-nudes and/ or pornography, sharing other explicit images and online bullying; and
- **commerce:** risks such as online gambling, inappropriate advertising, phishing and or financial scams. If you feel students or staff are at risk, please report it to the Anti-Phishing Working Group (<https://apwg.org/>)

In order for us to maintain the welfare of pupils and to create a safe work environment, Norfolk initiative Steiner School- private, limited by guarantee, company number- 4815492. Registered charity number- 1099377. VAT number 479189821. Registered office: Norwich Steiner School, Hospital Lane, Norwich, NR1 2HW

Norwich Steiner School work to do all that they can to limit exposure to the above risks. A large part of this process is ensuring that the school has appropriate filtering and monitoring in place.

Filtering is a preventative measure that protects pupils from being able to access inappropriate, illegal and potentially harmful content online by identifying and blocking specific web links and content.

Monitoring is reactive and can be both manually and technically managed. Manual monitoring may involve the teacher viewing pupil's screen as they walk around the classroom. Whereas technical monitoring relies. On software being installed on devices that can view individual activity and sends alerts/ reports to nominated safeguarding staff if a pupil accesses or tries to access inappropriate, illegal or harmful content.

In order to meet the government standards and statutory advice and to protect our pupils online, we have invested in a filtering and monitoring system through a company called "Securly". Securly are also a member of the Internet Watch Foundation (IWF).

The Department for Education (DfE) have produced a set of filtering and monitoring standards which states that school and colleges should:

- identify and assign roles and responsibilities to manage filtering and monitoring systems
- review filtering and monitoring systems at least annually
- block harmful and inappropriate content without unreasonably impacting teaching and learning
- have effective monitoring strategies in place that meet their safeguarding needs

Technology, risks and harm related to it evolve and are rapidly changing. The designated safeguarding leads (DSL's) in the school hold overall responsibility for meeting the government standards on filtering and monitoring and will review the school's filtering and monitoring provision at least annually.

The Lead DSL is also responsible for any safeguarding and child protection concerns that are identified through monitoring.

We are aware that many children have unlimited and often unrestricted access to the internet through their mobile phones. As a result, we are also aware that some pupils may be at risk at risk of and exposed to inappropriate and harmful content outside of school hours.

Parents play a critical role in ensuring that their children understand that their children need to use the internet and their devices in a safe and appropriate way. We work closely with parents to ensure that they have up to date information in order to help keep their children

safe. We help parents understand these issues through parent's evenings, newsletters and e-safety bulletins. Parents are encouraged to support the school in promoting good online safety practice and to support their children in following school policies. The DSL's act as a point of contact in school and source of information for parents.

Providing safeguarding information to pupils:

We provide safeguarding information and guidance directly to the pupils across the school. Kindergarten and younger school pupils are provided with safety messages through specifically designed developmentally appropriate narratives and the teachers address any issues or questions that arise in an age-appropriate way. From class 5, pupils receive information and guidance via the RSHE curriculum, in sponsor and global issue lessons and again teachers address any questions as they arrive.

Use of technology in school

We have a strict mobile phone policy (see separate mobile phone policy) and through the implementation of this and the associated sanctions the school ensures that they are creating and maintaining a safe environment.

Mobile phones that are brought onto school site are switched off before pupils enter the school sight and are placed in a locked box which is kept in the school office until the end of the school day. It is for this reason that the risk of pupils accessing harmful or illegal content whilst in school is low.

Early years pupils (aged 3-6)

No electronic devices or technology is used in the kindergarten. Children do not bring devices into school. It is therefore very unlikely and extremely low risk that pupils would access any harmful or illegal material online in school.

Lower school (pupils aged 6-13)

Electronic devices and/ or computers are not used in lower school and any mobile phone that is brought into school is switched off and kept in a locked box in the school office until the end of the school day. The risk of these pupils accessing harmful or illegal material whilst in school is therefore low.

Upper school (pupils aged 13-19)

Pupils are expected to switch off their mobile phones before coming onto school site and are expected to place their mobile phone in a locked box in the office until the end of the school day. For this reason and that mobile phone use in school is strictly prohibited, the risk of pupils

Norfolk initiative Steiner School- private, limited by guarantee, company number- 4815492.

accessing harmful and/ or inappropriate content using their mobile phones in school remains low. When pupils start their NZCSE, they are able to access laptops and use either their own personal device or a school laptop. They are only permitted to use these for work and research purposes. As the school has a secure filtering and monitoring system in place which blocks harmful and inappropriate websites as well as sending alerts to the DSL's if something concerning is accessed or access is attempted, the chances of pupils accessing harmful/ illegal or inappropriate content through such devices is also low.

Computer use is monitored through both manual and technological checks using the schools filtering and monitoring system.

Where pupils are found to have deleted their search history or where they have tried to access apps that they have not been given permission to access, the class guardian or DSL will speak with them and explain that they are in breach of their computer user agreement with the school. Staff will discuss the issues of trust and the implications of mistrust regarding computer use. In cases of concern, pupils be prevented from using computers for a defined period of time or they may only be able to use them for specific tasks where staff can see their screen.

The school continues to review their approach to filtering and monitoring as well as internet safety, taking into account statutory guidance and changes to risk whilst remaining conscious to the fact that over-blocking may adversely affect pupil's educational experience and ability to manage their own online safety outside of school.

Staff responsibilities:

Staff acknowledge that children from kindergarten upwards will be accessing devices and content outside of school and are alert to any areas of concern which are addressed with parents or the safeguarding team as appropriate.

All staff have an awareness and understanding of online safety, including radicalisation, as part of wider safeguarding in the school, and this is reflected in safeguarding training. Upper school staff are alert to pupils' online activity in class and the DSLs act as a source of information for all staff. Training is provided annually for all staff, and the DSL has also undertaken NSPCC training in keeping children safe online, sexual harassment, peer on peer abuse, and child sexual exploitation and abuse.
